Who We Are:

International Maritime Services companies include: International Maritime Services, Inc. [USA], SEA Maritime Services Pte. Ltd. [Singapore], and MY Maritime Services Sdn. Bhd. [Malaysia].

Dynamic Positioning simulator training is just one of our maritime safety and performance improvement services. Our Nautical Institute accredited Class A and Class C simulators ensure students get the hands on experience they need.

In addition to the International Maritime Services DP Training Centre in Singapore, we have a mobile simulator option for clients with long term DP training needs.

“No job is so big or so small that it cannot be done safely and professionally.”

What We Offer:

Nautical Institute Accredited Dynamic Positioning Courses

DP Induction (Basic) - 5 days

A theory-based course with guided practical exercises that introduce the trainee to various DP operational modes.

DP Simulator (Advanced) - 5 days

The course principally involves simulated DP operations including errors, faults and failures, giving the trainee an opportunity to apply lessons learned during the Induction Course and supervised sea time.

DP Sea Time Reduction - 5 days

Predominantly practical, the course focuses on operations. It is simulator-based with guided practical exercises to maximize 'hands-on' experience. Trainees can reduce the supervised sea time required to obtain their DPO Certificate by up to 30 days.

DP Refresher & Competency Assessment - 5 days

A course for trainees already holding a valid DPO Certificate from the NI but needing to refresh their knowledge of DP.

DP Revalidation - 5 days

A course for trainees already holding a valid DPO Certificate from the NI but unable to revalidate their DPO Certificate because they have not gained enough DP sea time.

DP Emergency Shiphandling - 4 days

A course for Deck Officers or DPOs who engage in manual ship handling activities on vessels operating in DP mode.

DP Knowledge for Tech. Staff Part A - 4 days

The course helps meet the continuing professional development needs of technical staff engaged in operations aboard DP vessels. It is also recommended for Deck Officers and shore staff who require a greater technical understanding of operating DP equipment.

DP Training Specialist

Our DP trainers are experienced captains and engineers from various types of DP vessels, with different classes of DP systems and manufacturers. They understand DP operations and the risks associated with its use.
